Angular (RxJs, NgRx, Material) / React / Node / Ionic Famework / Typescript / HTML / CSS / Mongo DB / SQL / Java / SpringBoot / Elasticsearch (Basics) / Jenkins / Docker / Shell scripts / Git / Agile-Scrum

WORK EXPERIENCE

Software Development Engineer III
Dutchview IT [01/2018 – Current]

City: Deventer
Country: Netherlands

FlexWhere - It's a software product for enabling organisations with **hybrid working** and **hot desk solutions** with reservation for workplaces, meeting rooms and parking spots along with realtime and history statistics and more.

Implementation strategy : Angular 12, Angular Material, Ionic, RxJS, React, Typescript, Node, Shell scripts, Laravel framework, Java Spring Boot services and more.
- Evaluating customer needs and coming up with ideal solutions for it, assessing different languages, architecture and risks.
- Design and implement end-to-end product features in collaboration with UX Designers, Data scientists, and other Developers.
- Deploy and maintain software in production with Jenkins, Docker containers and deployment scripts.
- Proactively propose improvement ideas to reduce technical debt and increase business impact of your team.

Full Stack Web Developer
Cognizant [04/2016 – 12/2017]

City: Bengaluru
Country: India

Microsoft BVS App – Microsoft BVS(Business Value Service) App is a MICROSOFT internal product which predicts the future profit or loss of a digital initiative provided initial capital, costs and benefits data.

Implementation strategy : Angular 4, RxJS, Bootstrap, Typescript 2.4, Node, Express, Webpack, HTML, CSS, VS Code
- Work closely with Microsoft team in Bengaluru division with requirement gathering, code reviews and performance optimisations.
- Agile implementation for development and Azure DevOps for hosting.

- To meet project needs, develop Node-powered RESTful API services, custom node plugins, and an angular client-based solution that can reproduce Excel sheet formulas and projections.
- Develop customer dashboard with overall productivity of the app.

Web developer
Indegene Limited [05/2015 – 04/2016]

City: Bengaluru
Country: India

Interactive Detailers (iDetail) apps are FDA approved, that help medical representatives connect doctors to market their brands. My role is to develop CLM (Closed Loop Marketing) hybrid apps for iOS devices using platforms like Veeva CRM (Customer Relationship Management), Salesforce and more.

Implementation strategy : HTML, CSS, JavaScript, jQuery, Veeva CRM, Veeva analytics, Salesforce, SVN, Sublime etc.
- Interaction with the client and gather requirements.
- Develop user Veeva app compatible rich UI for iOS devices like Mac and iPads.
- Agile Model implementation for software development
- Capture analytics like user clicks, time spent, user interests etc.,
- Cross Browser compatibility testing.
