ABOUT ME

I'm a creative professional Full Stack Web Developer with over 8+ years of experience in latest web design and development solutions.
I have good exposure in developing single page applications, portals, hybrid apps, native apps, CRM platforms along with strong understanding of best practices, analytical capabilities, organisational skills and ability to complete a successful implementation of customer requirements.

DIGITAL SKILLS

Angular | React | Node | Spring | Typescript | MEAN stack | Mongo DB | SQL | HTML | CSS | Jenkins | Docker | Shell scripts | SASS | Git

WORK EXPERIENCE

[01/2018 – Current]

Software Development Engineer III

Dutchview IT

City: Deventer
Country: Netherlands

FlexWhere - It's a software product for enabling organisations with **hybrid working** and **hot desk solutions** with reservation for workplaces, meeting rooms and parking spots along with realtime and history statistics and more.

Implementation strategy : Angular 12, React, Typescript, Node, Shell scripts, Laravel framework, Java Spring Boot services and more.
1. Design and implement end-to-end product features in collaboration with UX Designers, Data scientists, and other Developers.
2. Evaluating customer needs and coming up with ideal solutions for it, assessing different languages, architecture and risks.
3. Deploy and maintain software in production with Jenkins, Docker containers and deployment scripts.
4. Proactively propose improvement ideas to reduce technical debt and increase business impact of your team.

[04/2016 – 12/2017]

Full Stack Web Developer

Cognizant

City: Bengaluru
Country: India

Microsoft BVS App – Microsoft BVS(Business Value Service) App is a MICROSOFT internal product which predicts the future profit
or loss of a digital initiative provided initial capital, costs and benefits data.

Implementation strategy : Angular 4, Typescript 2.4, Node, Express, Webpack, HTML, CSS, VS Code

1. Work closely with Microsoft team in Bengaluru division with requirement gathering, code reviews and performance optimisations.
2. Agile implementation for development and Azure DevOps for hosting.
3. To meet project needs, develop Node-powered RESTful API services, custom node plugins, and an angular client-based solution that can reproduce Excel sheet formulas and projections.
4. Develop customer dashboard with overall productivity of the app.

Cloud Central Integration – Cloud Central Integration (CCI) is a data hub for integrating cloud and on-premises ORACLE applications of customers with multiple integrations and works on a subscription-based model.
Implementation strategy : Angular 2, Typescript, AngularJS 1.6.x, Java, Bower, Grunt, Node, HTML, CSS, SVN, ORACLE 12g, etc.,

1. Spiral Model implementation for solution development since the prototype was being developed from scratch.
2. Develop Java based REST services comprising PL/SQL as a database.
3. Develop client and admin frontend apps to meet project requirements.
4. Automate and Optimise the development process with Bower, Grunt and Node.

[05/2015 – 04/2016]

Web developer

Indegene Limited

City: Bengaluru
Country: India

Interactive Detailers (iDetail) apps are FDA approved, that help medical representatives connect doctors to market their brands. My role is to develop CLM (Closed Loop Marketing) hybrid apps for iOS devices using platforms like Veeva CRM (Customer Relationship Management), Salesforce and more.

Implementation strategy : HTML, CSS, JavaScript, jQuery, Veeva CRM, Veeva analytics, Salesforce, SVN, Sublime etc.

1. Interaction with the client and gather requirements.
2. Develop user Veeva app compatible rich UI for iOS devices like Mac and iPads.
3. Agile Model implementation for software development
4. Capture analytics like user clicks, time spent, user interests etc.,
5. Cross Browser compatibility testing.
